

Character Kit by Danya Gómerz

C A F É
Gummersbach

This project (for the Computergrafik und Animation course at TH Köln) is a cozy, cartoon-style café game where players take on the role of baristas, featuring detailed 3D models, interactive gameplay mechanics, and a warm, inviting atmosphere.

Players can choose the POV of

Brioche (he/him)

or

Macchiato (she/her)

The characters were meant to closely resemble the human models from *Animal Crossing: New Leaf*, since they are an easily recognizable, strong brand, and were the original inspiration for the project's style.

Some visual assets, like a project logo and the facial catalog, were made using Canva, but the assets were all developed in Blender 4.2 (which I learned from scratch for this project).

Face assets (hand-made in Canva)

360° of Macchiato (female barista)

360° of Brioche (male barista)

360° of Hans (client)

360° of Emilia (client)

360° of Sophie (client)

Development process
